SPECIALIZED/PINARELLO/MERIDA

MERIDA SCULTURA DISC TEAM-E £8000

TEAM BAHRAIN MERIDA'S SUPERLIGHT DISC BIKE

Merida's Scultura is its WorldTour machine, as used by riders at Bahrain, and while it does have the Reacto for aero needs, it remains the bike designed for GC riding, so it's all about lightweight and nimble handling.

On the road this Scultura is everything that makes a classic lightweight race bike, the 860g frame is a stiff centrepiece to a lightweight whole (7.22kg) and a combination of sublimely fast handling and exactly the sort of finishing kit you'd expect from an £8000 bike makes for an additively great bike to ride.

The build is superb: Shimano's premier Dura-Ace Di2, hydraulic brakes with Ice-Tech rotors, and the quality Dura-Ace cassette. FSA's K-Force light carbon bar and OS99 stem create a super light cockpit and reduce road buzz and chatter.

DT Swiss provides its brilliant PRC1400 tubeless ready wheels and at the back you'll find Merida's compliant carbon seatpost topped with Prologo's excellent Nago saddle, which is covered with its patented grippy CPC cover.

If you'd like a piece of legendary racing equipment and have pockets deep enough then the Scultura Disc Team-E certainly won't disappoint.

SPECIFICATIONS

WEIGHT 7.22kg (M/L)
